About Us

We, **Komtech Metal And Alloys**, are the right choice for buying various tube fittings and foil tapes. Focusing on our guiding principles of unity, perseverance and innovation, we as a market leading **manufacturer** and **exporter**, deal in a range of perfectly constructed **Round Copper Tubes, Round Seamless Stainless Steel Tubes, Golden Brass Tubes, Round Aluminium Brass Tube, Copper Foil Tape**, etc. We use mature production technology and rely on meticulous testing processes to create products as per approved international standards. We have experts staffed at our various departments who work with the aim to establish long-term cooperative relationships with customers from home and abroad.

Our Motto

We always toil hard and leverage our engineering and networking skills to deliver products constructed with special materials and in tailor made specifications to our Indian and global clients.

Our Team

Though we do not have enough experience backing us as a company, we are proud to state that all our experts have commendable experience and know metals and the metal industry better than most of our competition. The goal of our competent team is to stay helpful and dedicated at all times so that we as a client focused firm can supply what clients need at the exact quality level that they require. Our experts also render unbeatable service and remains on their toes to give complete satisfaction to clients looking for non-standard products in special dimensions, finishes and sizes.

Our Facilities

Manufacturing excellence starts with the right setup. We have a robust plant where our team of engineers, metallurgists and technicians exerts their knowledge of the working of the metal industry. In the design phase, they work together to develop products like Round Copper Tubes, Golden Brass Tubes, Round Aluminium Brass Tube, Copper Foil Tape, etc., as per product specifications provided by customers. Through optimum material selection, and implementation of the right technology, they then build economical and technically rich products that exceed client expectations.

Our professionals also remain well informed when it comes to international quality norms, following which they evaluate chemical and physical properties of each and every product. Combined efforts of our production and quality control teams help us offer specialized products at fair rates. Offering the best combination of quality and price have made us a reputable manufacturer in India and our export business more competitive around the world today.
